CLOVIS REPORTS SEVEN INCHES OF RAIN, WITH WIND.

Clovis, N. M., June 4.—The rain which fell over eastern New Mexico from the Pecos to the Texas Panhandle Friday afternoon and evening proved to be the heaviest ever recorded in this section of the country. In Clovis, seven inches fell in three hours and the whole city and country was flooded. No great damage was done in the surrounding country but considerable damage was done in Clovis, sewer ditches being caved in in all parts of town. The rain was preceded by a terrific wind which unroofed several buildings. Two dwelling houses were struck by lightning during the storm. Many basements were filled several feet with water and some damage was done to goods in the stores. The rain was greatly needed and if it had been delayed for two weeks longer the crops would have been hopeless. Crops are now assured, however, and the farmers and merchants are jubilant today. Business has revived and many of the farmers are buying big bills of farming machinery.

In Clovis the water has receded from the streets leaving the weather hot and sultry today. A report from Fort Sumner says the water ran two feet deep in the streets there. Two hundred feet of Santa Fe track are said to be washed out between Fort Sumner and Yeaso. A big irrigation dam near Fort Sumner was badly damaged, as also were a number of irrigation ditches. Telegraph wires were down for some time yesterday evening, cutting off communication with surrounding towns.

McCUNE IS GENERAL

MANAGER OF LOAN CO. In stating yesterday that R. H. McCune had resigned his position as secretary of the Roswell Building & Loan Company, the Record neglected to state that he would continue his services with the company as general manager, leaving the work as secretary to E. G. Minton. Heretofore Mr. McCune has held both offices but the business of the company has reached the point where he had to give up one of them. He continues as active head of the business of the concern.

DISCOVER NEW ARTESIAN DISTRICT IN VALLEY.

Sperry & Lukins drilling on the land of F. J. Lukins, three miles northeast of Lake Arthur brought in a fine well last Friday that is the talk of that section of the valley, for the reason that the new well was found in a section of the country where no wells had been found and that was supposed to be out of the artesian district. The discovery brings into the artesian district a large body of land and other wells will now be drilled in that locality. The new well is a valuable one, having a twenty inch flow over an eight inch casing. The water is pure and sweet.

PARSONS AND MULLINS GETTING UP DIRECTORY.

Roy Parsons and James W. Mullins, both of whom had an active part in taking the census of Roswell for the purpose of getting up a directory of the city. They predict that they will secure five hundred more names than were given to the official enumerators. The Government census of Roswell will not be officially announced before September. This information comes from Paul A. F. Walter of Santa Fe, who has charge of the census in New Mexico as supervisor for the territory. The private census of Parsons and Mullins will be announced in three weeks. They will have a complete city directory with much additional information as to streets, buildings, etc.
